### About

15+ years in software development, architecture and project management. Full-stack engineer focused on scalable, maintainable systems.

Worked with companies in the UK, Europe and the US. Built several enterprise-level products as an engineering manager and individual contributor. Ideated, architected and implemented systems and processes as a technical consultant and project lead.

Seeking a role at an ethically minded company with exciting challenges, where I can grow technically and work with an exceptional, welcoming team.
