About

15+ years in software development, architecture, and project management. Full-stack engineer focused on scalable, maintainable systems.

Worked with companies in the UK, Europe, and the US. Built several enterprise-level products as an engineering manager and individual contributor. As a technical consultant and project lead, ideated, architected, and implemented systems and processes.

Seeking a role at an ethically minded company with exciting challenges, where I can grow technically and work with an exceptional, welcoming team.

Core Technologies

TypeScript ES.Next React Next.js GraphQL

Node Express NestJS Fastify

Postgres MongoDB CosmosDB

Prisma Sequelize Mongoose

Terraform Kubernetes Docker

Lambda S3 SNS SQS

Vitest Jest Playwright Cypress

Ruby Rails RSpec Capybara

Python TensorFlow OpenCV
