About

15+ years in software development, architecture, and project management. Full-stack engineer focused on scalable, maintainable systems.

Worked with companies in the UK, Europe, and the US. Built several enterprise-level products as an engineering manager and individual contributor. As a technical consultant and project lead, ideated, architected, and implemented systems and processes.

Seeking a role at an ethically minded company with exciting challenges, where I can grow technically and work with an exceptional, welcoming team.

Core Tech

TypeScript   ES.Next   React   Next.js   GraphQL

Node   Express   NestJS   Fastify
